

A black and white photograph of laboratory glassware, including a large Erlenmeyer flask in the foreground and several beakers in the background, all containing liquids. The image is partially obscured by a red overlay on the right side.

ImageSolv™ RI

Engineered for Digital Plates

Excellent mask solubility

Virtually Odor Free

Pleasant working environment

Requires no balancing

Consistent quality day in and day out

WWW.JVISINC.COM

ImageSolv™ RI: *The safest, fastest, and easiest processing solution available.*

ImageSolv™ RI was developed in the late 90's as an alternative to water soluble flexo plates. We established performance criteria based on the present conditions as well as the future demands.

What we created provided the Flexo industry with the first low odor, fast processing, stable chemistry that never needs balancing. The solution contains no RCRA Hazardous material and therefore requires no special handling or shipping requirements.

Works with **all** current flexo plates: Digital & Analog

- Low odor: Pleasant working environment
- Fast processing: Improved productivity
- Excellent solubility: Superior plate quality
- Distills easily: Never needs balancing
- Environmentally friendly: No Hazmats
- Low Toxicity: Safe to use
- Processing equipment stays cleaner:
Less maintenance

ImageSolv™ RI is an integral part of the Rapid Imaging System that includes state of the art processing equipment and chemistry management.

For more information on the RapidImaging® System, or to see a demonstration of this exciting new technology, visit www.jvis-flexo.com or phone 770-420-4006.
